### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/16/05 has been entered.

### ***Election/Restrictions***

2. Newly submitted claims 26-27 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Inventions as originally claimed and claims 26-27 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require a step of forming a winding with an electrically insulating layers to be disposed between a pair of conductive layers" as required by the subcombination. The subcombination has separate utility such as forming a winding having an insulating layer disposed between a pair of electrically conductive layers and/or curing the resin by providing electric power from the power source to the

Art Unit: 3729

conductive layers, etc. Note that the Office generally does not permit shift of elected subject matter (see section 819 of the MPEP).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 26-27 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

3. This application is in condition for allowance except for the following formal matters:

The Drawings:

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter such as "a power source and connecting the power source to the electrical conductor as to cure the adhesive" as now recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate

Art Unit: 3729

figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

In the claims:

a) " transformer " (claim 1, line 1) should be changed to: --"transformer winding--.

b) "a transformer winding" (claim 1, line 4) should be changed to:-- the transformer winding--.

c) "curing "(claim 1, line 12) should be changed to: --melting and curing --.

d) It is also suggested the subject matter such as:" – wherein the melting and curing the adhesive by energizing the electrical conductor so that a current greater than a rated current of the transformer winding flows through the electrical conductor"--, should be incorporated back into claim 1.

e) Non-elected claims 26-27 (see above reasons) are requested to be cancelled.

Art Unit: 3729

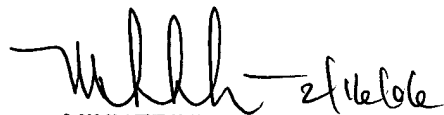

\* Further, Applicants' cooperation is requested in correcting any errors of which applicant may become aware in the claims.

4. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
